NEW DELHI 3 (INDIA)

The 5th September, 1949.

S. P. JAIN,
for Registrar General, India.

NATIONAL

SAVINGS

CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 6th August 1949.

REMARKS

The figures of births and deaths shown in this statement for week ending the 6th August, 1949 relate to 182 towns with an estimated population of 23,338 thousands. The total number of towns is 213 and their population is 25,943 thousands. Thus 85% of the total number of towns representing 90% of the total population is covered in this statement. The numbers of births and deaths recorded in those towns were 14,739 and 88,24 representing birth and death rates of 32.8 and 19.7 per thousand of the population respectively.

(A) *Indian Provinces*.—The data here relate to 163 towns with an estimated population of 21,222 thousands. Information from Bihar and Assam could not be included. The total number of towns is 189 and their population is 23,320 thousands. Thus 86% of the total towns representing 91% of the total population is covered. The numbers of births and deaths recorded in these towns were 13,560 and 8,154 representing birth and death rates of 33.2 and 20.0 per thousand of the population respectively. The table at the end gives

the position by provinces. Etawah in U.P. and Puri in Orissa recorded high death rates of 52.9 and 52.0 per thousand of the population respectively. In Etawah there was a number of deaths from cholera; deaths from fevers and respiratory diseases were considerable. In Puri deaths from fevers and dysentery and diarrhoea were quite large.

(B) *Unions and States*.—The data here relate to 19 towns with an estimated population of 2,116 thousands. The total number of towns is 24 and their population is 2,623 thousands. Thus 79% of the total number of towns representing 81% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,179 and 670 representing birth and death rates of 29.0 and 16.5 per thousand of the population respectively. No town recorded a high death rate of 50 or over per thousand of the population.
